| Course objective | <p>Course objective:</p> <ol style="list-style-type: none"> 1.Acquiring knowledge about definition of Kurzweil-Henstock integral and its applications 2 Acquiring knowledge about fundamental theorem of calculus for Kurzweil-Henstock integral 3. Acquiring knowledge about convergence theorems for Kurzweil-Henstock integral | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Learning outcomes | <p>Having completed the course student can:</p> <ol style="list-style-type: none"> 1. Apply the Kurzweil-Henstock for selected classes of functions - effects W4, U4, K1 2. Give the respective version of the fundamental theorem of calculus with argumentation - effects W4, K1 3. Describe selected convergence theorems for the Kurzweil-Henstock integral - effects U4, K1 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Assessment methods | <p>W4 - oral exam</p> <p>U4, K1 - project seminar presentation</p> <p>W4, U4 - written project</p> <p>The final evaluation is based on:</p> <p>Exam - 50%</p> <p>Presentation - 20%</p> <p>Project evaluation - 30%</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|---|---|
| Prerequisites | Foundations of theory of the Riemann and the Lebesgue integrals |
| Course content with delivery methods | <p>Course content divided into two forms:</p> <p>LECTURE</p> <ol style="list-style-type: none"> 1. The Causin lemma. Definition of the Kurzweil-Henstock integral on $[a,b]$. 2. Properties of functions integrable in the Kurzweil-Henstock sense. 3. Fundamental theorem of calculus. The Saks-Henstock lemma and its consequences. 4. Convergence theorems for the Kurzweil-Henstock integral. <p>PROJECT</p> <ol style="list-style-type: none"> 5. Examples of integration of functions in the Kurzweil-Henstock sense. |
| Basic reference materials | <ol style="list-style-type: none"> 1. R. G. Bartle, A modern theory of integration, AMS 2001. 2. R. A. Gordon, The integrals of Lebesgue, Denjoy, Perron and Henstock, AMS 1994. |
