

Conference Guide

**International Scientific Conference
'Leaders of the Future: Project
Management and Innovation'**

24 April 2026

hybrid event: online and in-person (Szczecin, Poland)

Bringing science closer to you – and you closer to science!

The Blisko Nauki Association carries out projects for the academic community in Poland that aim to support young researchers and help them acquire the knowledge and competencies necessary for academic and research work in the field of social sciences.

Are you wondering how to take your first steps in the world of science? Or maybe you are looking for a space where you can develop your ideas, meet inspiring people, and discover new opportunities? The conference 'Leaders of the Future: Project Management and Innovation' has been created especially for those who want to expand their competencies and actively shape their professional future.

The purpose of the Conference

The aim of this conference is to create an inspiring environment for students who wish to actively engage in scientific life by sharing the results of their own research and reflections related to areas such as project management, leadership, entrepreneurship, and innovation.

Participants will be able to take their first step on the academic path by presenting their achievements, which will then be discussed and evaluated by experienced academic staff.

Conference Format

The conference has been planned in a hybrid format, enabling both on-site and online participation. The conference program will be divided into thematic presentation panels.

The conference will feature presentations by students and PhD students, ensuring a diversity of topics and research approaches.

Topics

1. Project Management and Leadership

- sustainable project management
- project management in the digital era (AI, automation, agile methodologies)
- project leadership and team development
- integration of ESG objectives into the project life cycle
- building project resilience to climate change and environmental risks
- ethical decision-making in projects and social responsibility of leaders
- other related topics

2. Innovation and Entrepreneurship

- entrepreneurship development (startups, crowdfunding, business models)
- future technologies in business and management
- collaboration between science and business (knowledge transfer, R&D projects)
- sustainable business models and green innovation
- circular economy and eco-design of products
- the role of social entrepreneurship in achieving the Sustainable Development Goals
- other related topics

Why attend?

- 1**
Insight into the world of science
- 2**
New connections and networking opportunities
- 3**
New career opportunities
- 4**
Certificate of active participation*
*for presenters only
- 5**
Opportunity to present your own research
- 6**
Experience

Important Dates

by 31 Jan 2026

Main registration phase for conference participation (abstract submission required)

by 28 Feb 2026

Deadline for acceptance of applications submitted in the 1st round by the Scientific Council
