

What's next for research?

eGrad School **QUT**

Translating innovation
into **global impact**

Join a global community of researchers
to share ideas, spark collaboration and
shape the future of research together.

e-Grad School
GLOBAL CONFERENCE 2026

TUESDAY
24 NOVEMBER 2026

LIVE ONLINE

FREE TO ATTEND

eGrad School Global Conference 2026

Be part of what's next.

Join researchers from QUT, Australia and around the world for an inspiring online conference exploring new ideas, emerging research and how innovation can create meaningful real-world impact.

Whether you're an HDR student, early career researcher, academic, research professional or industry partner, everyone is welcome.

The conference will explore four key areas:

Emerging Technologies
AI, robotics and technologies

Entrepreneurship & Commercialisation

Responsible & Ethical
responsibility and impact

Global Collaboration & Systems Impact

KEYNOTE SPEAKER

Distinguished Professor
Lyn Griffiths

Internationally recognised
for her work in genomics
and translational research.

“ *Bridging Genomics, Technology,
and Translation for Real-World Impact*

A keynote exploring the journey from
discovery through technology and
translation to outcomes that make
a real difference.

Join a global research community
Connect with global graduate researchers, industry professionals and academics.

Conference themes

Presentations should align with one or more of the conference themes

Emerging Technologies

Exploring the technologies, tools, and approaches transforming research and society. We welcome presentations on artificial intelligence, machine learning, climate and sustainability technologies, robotics, digital health, biotechnology, quantum technologies, advanced data analytics, immersive technologies, digital research methods, and other innovations shaping the future of research.

Responsible and Ethical Innovation

Research that considers the broader social, environmental, and ethical implications of innovation. We encourage presentations that explore responsible research practices, governance, research integrity, Indigenous knowledge, equity, inclusion, data ethics, and approaches that ensure innovation delivers positive outcomes for communities.

Entrepreneurship and Commercialisation

Showcasing how research is translated into real-world impact through innovation, partnerships, and enterprise. We welcome presentations on research translation, industry collaboration, intellectual property, start-ups, commercialisation pathways, funding, innovation ecosystems, and careers beyond academia.

Global Collaboration and Systems Impact

Research that creates impact through collaboration across disciplines, sectors, institutions, and borders. We encourage presentations on international partnerships, interdisciplinary research, policy translation, systems thinking, open science, and collaborative approaches to solving complex global challenges.

Why join us?

Discover new research.
Hear fresh perspectives.
Connect across disciplines.
Be inspired by researchers from around the world.

FREE TO ATTEND | LIVE ONLINE

One conference. Many disciplines. New connections.
Be part of what's next for research.
