

EPAE 2026

ENVIRONMENTAL PROTECTION & ENERGY CONFERENCE

Invitation to the Environmental Protection and Energy 2026 Conference

We are pleased to invite you to participate in the **14th edition of the International Scientific Conference Environmental Protection and Energy**, to be held on **4 December 2026**. For many years, this event has served as an international forum for the exchange of knowledge and experience, bringing together students, doctoral candidates, researchers, and experts representing various fields related to environmental protection and energy.

The aim of the conference is to create a space for presenting research results, discussing current challenges, and seeking innovative solutions in support of sustainable development. The programme covers topics including environmental protection, ecology, biodiversity, energy transition, circular economy, and modern technologies for reducing the negative impact of human activity on the environment.

This year's edition has been enriched with a new thematic area - **Sustainability and Health**. This strand will be dedicated to the relationships between environmental conditions, sustainable development, and the health and quality of life of society, reflecting the growing interest in this topic across both academia and practice.

Participants will have the opportunity to present their work in oral or poster sessions. For the convenience of both presenters and attendees, the conference will be held in a hybrid format, allowing participation both on-site and online.

EPAE 2026 is not only an opportunity to present your own research, but also a chance to establish academic collaborations, gain new inspiration, and exchange experiences with representatives from various academic institutions and organisations. The conference also provides a platform for presenting and accounting for the outcomes of ongoing projects, including **PBL (Project-Based Learning)** projects, as well as research, implementation, and educational initiatives.

Authors of submitted papers will have the opportunity to publish their findings in a peer-reviewed post-conference monograph and in selected international scientific journals.

For doctoral candidates, participation in the conference may constitute an important element in fulfilling the requirements of Individual Research Plans and developing their academic output.

Detailed information regarding the conference, submission deadlines, and participant registration is available on the website: www.epae-conference.com

For any enquiries, please contact us at: EPAE@polsl.pl

We warmly encourage you to join the 14th EPAE Conference - let us together create a space for the advancement of science and best practices in the field of environmental protection and energy!

The project is financed from the state budget, allocated by the Minister of Science and Higher Education under the Wektory Nauki Programme.
